Summary

Full-Stack Software Engineer with expertise in API development, authentication systems, and AI-integrated applications. Built scalable backend systems serving 500+ users with <200ms latency. Passionate about workflow automation and emerging AI technologies

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript
FrontEnd : ReactJs, Redux Toolkit, HTML5, CSS(Tailwind Css), Responsive Design, Figma
BackEnd : NodeJs, ExpressJs, REST API's, JWT Auth, MVC Architecture
Databases : MongoDB, Firebase, Microsoft SQL Server, PostgreSQL
Tools & DevOps : Git, GitHub, Postman, Cloudinary, Vercel, Render, AWS (EC2)
AI/Intgrations : GPT-4 Integration, Deepgram, Nodemailer, SendGrid

PROJECTS

Testiva(AI-Integrated Learning Platform) (FYP) | *Flutter, NodeJs, ReactJs, GPT mini 4.0, Deep Gram*

- Served as **Backend Developer** in a cross-functional team; architected RESTful APIs, real-time sync, and AI evaluation pipeline.
- Implemented **Role-Based Access Control (RBAC)** managing 500+ users, study resources, and admin operations across all four IELTS/PTE modules (reading, listening, writing, speaking).
- Built intelligent **AI mock-test evaluation system** using GPT-4o and DeepGram, automating writing and speaking assessment with instant feedback, reducing manual grading to zero.
- Optimised backend with **Node.js + Express.js**, achieving real-time data synchronisation at **<200ms latency** and **99.9% uptime** for community discussions and scorecards.
- Designed modular **MVVM architecture**, reducing code redundancy and enabling seamless scalability across all test modules.

Bazaarly --- MERN Grocery E-Commerce Platform | *NodeJs,ExpressJs,MongoDb*

- Built a production-ready MERN grocery store with **JWT authentication**, email OTP verification, and **Redux Toolkit**-managed cart and checkout flow.
- Developed a **separate admin panel** for product CRUD, order management, and Easypaisa payment verification with COD workflows.
- Implemented **atomic stock validation** to prevent race conditions, Cloudinary image uploads via Multer, and full REST API coverage.
- Deployed frontend on **Vercel** and backend on **Render**; live at (<https://bazaarly-frontend.vercel.app/>).

EXPERIENCE

Software Engineering Intern

Sep 2025–Dec 2025

Nuexus-Technologies, Islamabad

- Designed and iterated on user interfaces for a key product, improving user engagement by X% through modern UX principles and Figma prototypes.

EDUCATION

Bachelor of Science in Computer Science (CGPA: 3.21 / 4.00)

Jan 2023 – Jan 2027

University of Haripur,UOH
